Weekly Science Task	Spotlight On...	
<p>Make a volcano!! Look out for instructions on ClassDojo!            You will need:            A plastic cup            Water            3-4 tablespoons of baking soda or more            1 teaspoon of washing up liquid            Washable paint (preferably red or orange)            1 cup of vinegar or more</p>	<p>Art            Have a go at using papier-mâché to make a dinosaur egg! You will need a balloon and strips of newspaper. You can use glue that is thinned with water but flour and water work well too for the paste. I will post instructions on ClassDojo.</p> <p>Physical Development            Which dinosaur are you?            Have a look at the dinosaur cards posted on ClassDojo. Talk to your grown-ups about the different dinosaurs, your grown up can help you read the information about them. Which dinosaur are you most like? Why? Can you move like this dinosaur? Think what else this dinosaur does? Can you show how it moves and what it does using your body silently?</p>	

### History and Geography

Can you identify key features of where you live.  
What can you see around you when you are out and about?

What were the key features when dinosaurs lived?  
Were they the same or different?

Can you compare then and now? You can draw, write, or do a video or voice recording to tell me what similarities and differences you have noticed.

Let me know how you are feeling about coming back to school next week – choose any way you like to share your feelings with me.
